## DETAILED ACTION

### *Specification*

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Rialan et al. (5276655).

As to claim 1, Rialan et al. discloses an apparatus adapted for seismic data acquisition in a land or transition zone environment (col. 4, lines 47-51) said apparatus comprising: a positioning device (col. 4, line 65-col. 5, line 1); a seismic sensor, capable of being placed near said positioning device (col. 4, lines 51-53); and means for determining the distance between said seismic sensor and said positioning device (col.4, lines 60-64) using an airborne acoustic transmission between said positioning device and said seismic sensor (col. 4, lines 37-42).

As to claim 2, Rialan et al. does not specifically disclose that the airborne acoustic transmission is produced by a speaker at said positioning device and received

by a microphone at said seismic sensor. This, however, would be inherent to a method utilizing airborne acoustic transmission.
